

FOST TRAINING RULE OF THE ROAD TEST OCT 16

This test is based on: The International Regulations for Preventing Collisions at Sea (1972) with amendments in force up to December 2009 as detailed in "A Seaman's Guide Pocket Book of The International Regulations for Preventing Collisions at Sea" (BR 453 Supp), ATP1(G) Vol I and the Mariners Handbook (NP100).

The test is designed to be given to any Warfare Officer, Deck officer, Officer undertaking bridge watch-keeping duties or Young Officer/Cadet. The test should be administered under written exam conditions, the results should be recorded in the OOW training records for inspection by FOST navigation staff. The exam should take no longer than 1 hr.

In this test, any change in the status of the ship or of the environment will be indicated in the script. Rules 1 to 19, 34, 35 and Annex IV must be known instinctively for instant application. A thorough knowledge of the other rules is required. The pass mark is 90%.

PART 1

1. In what situations shall the Rules apply? **(1a)**
(1)

2. In construing and complying with the Rules, what factors must be considered in all cases? **(2b)**
(2)

3. Define the term "vessel not under command" **(3f)**
(1)

4. Define the term "restricted visibility". **(3i)**
(1)

5. a. Define safe speed. **(6)**
(2)

b. In determining safe speed, what six additional factors shall be among those taken into account by vessels with operational radar? **(6b)**

(3)

6. The Rules state that proper use shall be made of radar equipment if fitted and operational. What in addition do the Rules specify concerning the use of radar? **(7b)**

(2)

7. What do the Rules require of any alteration of course and/or speed to avoid collision? **(8b)**

(1)

8. What obligation is placed on a vessel which is not to be impeded, when approaching the other vessel so as to involve a risk of collision? **(8f)**

(1)

9. What types of vessel shall not impede the passage of a vessel, which can navigate only within a narrow channel or fairway? **(9b)**

(1)

10. What do the Rules state with regard to a vessel crossing a narrow channel or fairway? **(9d)** (2)
11. What do the Rules require of a vessel crossing the traffic lane of a traffic separation scheme? **(10c)** (1)
12. What do the Rules require when two power-driven vessels are crossing so as to involve a risk of collision? **(15)** (1)
13. What should a vessel engaged in fishing, underway, so far as possible keep out of the way of? **(18c)** (1)

PART 2

You are the Officer of the Watch of HMS KENT (T23 frigate, length 133 meters). The ship has just sailed from Portsmouth. It is the forenoon watch, the weather is fine with good visibility. The shipping is moderate.

14. You sight a small vessel engaged in fishing at GREEN 30, range 3 miles. The bearing is steady and the range is closing. What action is required by the Rules? **(18)**
(1)
15. A coaster is sighted at RED 40, range 6 miles. The range is closing and the bearing is moving very slowly right.
a. What action is required by the Rules? **(15)**
(1)

b. You become concerned with the developing situation. Would a sound signal be appropriate and what should be sounded? **(34d)**
(1)

c. When do the Rules allow the stand-on vessel to manoeuvre? **(17a)**
(1)

d. What specifically should be avoided if the stand-on vessel manoeuvres by altering course? **(17c)**
(1)
16. You sight a vessel close in, apparently stopped off Fowey. How can you determine if the vessel is aground? **(30d)**
(1)
17. a. As you alter to pass No man's Land, you sight a small vessel displaying three shapes in a vertical line, the highest and lowest are ball shaped and the middle one a diamond. How should you approach this vessel? **(27b/18)**
(1)

- b. List two operations which this small vessel could be engaged in. **(3g)**
(2)
18. As you approach Warner Buoy, you sight a number of small vessels making way and exhibiting a shape consisting of two cones with their apexes together in a vertical line. (Lines are observed directly astern.) How are these vessels defined in the Rules? **(26b)**
(1)
19. Then, the lookout reports an open boat showing a rigid replica of a flag, which you identify as International Code flag "A". What does this signify? **(27e)**
(1)

Despite the fine start, you encounter a bank of fog ahead.

20. When should you commence making fog signals and what should they be? **(35/35a)**
(2)
- #
21. a. The lookout reports hearing a sound signal consisting of one short, one prolonged and one short sounded in succession. What precisely does this signify? **(35g)**
(2)
- b. As you approach the vessel making the previous sound signal, what signal would you expect to hear and at what interval? **(35g)**
(1)

22. You detect a vessel on radar at GREEN 30, range 6 miles. Careful plotting shows that a risk of collision exists. How should you manoeuvre if there are no immediate navigational constraints? **(19d)**
- (1)

23. You hear a sound signal consisting of three blasts (one prolonged blast followed by two short blasts). Assuming that the pitch indicates a fairly large vessel, list four types of vessel this would indicate? **(35c)**
- (2)

The light is fading but the good news is that visibility is rapidly improving.

24. Can you exhibit navigation lights before sunset? Explain your answer. **(20c)**
- (1)

25. You sight a vessel displaying two all-round red lights in a vertical line, in addition to the sidelights and sternlight. What is this, and what action should you take as you approach this vessel? **(27a)**
- (1)

26. You sight a vessel displaying two all-round lights in a vertical line, the upper being green and the lower white, in addition to sidelights and stern light. What is this? **(26b)**
- (1)

27. a. You sight a vessel ahead showing a two additional masthead lights in addition to her normal navigation lights. What specifically does this indicate? **(24a)**
- (1)

- b. Describe any additional light would you expect to see if you approached this vessel from astern? (Include arcs of visibility.) **(24a)** (1)
28. You sight a vessel displaying three all-round lights in a vertical line, the highest and lowest red and the middle light white. What type of vessel is this and what can you conclude if there are no normal navigation lights for a power-driven vessel? **(27b)** (2)
29. You sight two MCMV engaged in mine clearance exercises.
a. What lights should the vessels be displaying in addition to their normal navigation lights? **(27f)** (1)
- b. List four other naval operations during which the vessels would be considered as restricted in their ability to manoeuvre, but which must give way to the MCMVs. **(ATP1D)** (2)
30. List two visual methods by which a small yacht without VHF could indicate distress by day. **(37)** (1)
